Budget 2024: A New Dawn

Budget 2024: A New Dawn

Introduction

The 2024-25 budget, presented by Finance Minister Nirmala Sitharaman, marks a transformative moment for India's entrepreneurial landscape. Recognizing startups as integral to the business ecosystem, the government has introduced a range of measures designed to spur job creation, boost manufacturing, and empower MSMEs. This budget not only addresses the immediate needs of various sectors but also lays the groundwork for long-term growth and innovation.

Several key sectors, including FMCG, manufacturing, infrastructure, power, banks, housing, and agriculture, are poised to benefit significantly from the budget's provisions. Notably, the spacetech industry has received a dedicated INR 1,000 crore fund, underlining the government's commitment to fostering high-tech innovation. The emphasis on digital public infrastructure (DPI) further demonstrates the government's strategy to modernize critical areas such as agriculture, healthcare, finance, e-commerce, education, law and justice, and logistics, creating abundant opportunities for startups to innovate and thrive.

In this issue of the Budding Entrepreneur newsletter, we explore how Budget 2024 has impacted entrepreneurship across various sectors and uncover the new opportunities that have emerged. This edition focuses on how the budget is paving the way for a new era of economic growth and entrepreneurial innovation in sectors such as agriculture, defense, healthcare, HR, finance, telecom, and space tech.

Navigating the Future: Budget 2024's Bold Moves for the Finance Sector

Budget 2024 marks a pivotal moment for the finance sector, introducing a wave of transformative reforms and strategic investments. Central to this budget is a sweeping reduction in corporate tax rates, designed to invigorate the business landscape and attract fresh investment. The spotlight is also on fintech, with new incentives poised to drive innovation and keep the sector at the cutting edge of digital transformation. Regulatory reforms promise to streamline compliance processes, alleviating administrative strain and allowing institutions to zero in on growth and client relations. Additionally, the budget dedicates resources to enhancing financial literacy and inclusion, tackling long-standing inequities. These forward-thinking measures are set to stimulate economic expansion, fortify the sector's resilience, and pave the way for future achievements. As we step into this new era, stakeholders should brace for a landscape rich with opportunities and strategic advancements.

In a move to fortify sector stability, substantial investments are allocated for cybersecurity and risk management. Enhanced support for sustainable finance initiatives reflects a commitment to long-term resilience and environmental responsibility. These forward-thinking measures are set to stimulate economic expansion, fortify the sector's resilience, and pave the way for future achievements. As we step into this new era, stakeholders should brace for a landscape rich with opportunities and strategic advancements.

Union Budget 2024: Transformative Impact on HR Sector

With emphasis on Employment, Skill Development, and Inclusive Growth

The Union Budget 2024, presented by Finance Minister Nirmala Sitharaman, allocates Rs 1.48 lakh crore to optimize India's human capital, aiming to harness the country's demographic dividend. The HR sector anticipates substantial impacts on employment, taxation, internships, and entrepreneurship.

Bridging Academic and Industry Gaps:

A significant aspect of the budget is its focus on aligning academic learning with industry needs. The substantial allocation for education, employment, and skill development reflects the government's commitment to nurturing a skilled and job-ready workforce. The introduction of a comprehensive internship scheme, designed to provide opportunities for one crore youth in 500 top companies over the next five years, is poised to bridge the gap between academic learning and practical industry experience. This initiative is crucial for sectors like real estate and manufacturing, where practical skills and experience are highly valued.

Enhancing Women's Workforce Participation:

The budget also places a strong emphasis on enhancing women's participation in the workforce, a critical factor for achieving inclusive economic growth. The establishment of working women hostels and creches, along with tailored skilling programs, provides essential support for women balancing professional and personal responsibilities. Additionally, initiatives to improve market access for women-led enterprises and strengthen schemes like PM Vishwakarma and Stand-Up India are expected to promote women's entrepreneurship, thereby contributing to a more diverse and inclusive workforce.

Job Creation and Skilling:

The budget introduces a wage subsidy scheme for first-time formal sector employees, offering up to Rs 15,000 through Direct Benefit Transfer (DBT). This is complemented by investments in modernizing Industrial Training Institutes (ITIs) and skilling programs targeting 4.1 crore youth over five years.

Incentives for Skill Development and Training:

The budget also addresses the critical need for skill development, with substantial investments aimed at modernizing Industrial Training Institutes (ITIs) and aligning their courses with industry needs. The upgraded skilling program, which aims to reach 4.1 crore youth over five years, is expected to significantly enhance employability and career growth prospects. Additionally, the revised Model Skill Loan Scheme and financial support for higher education through e-vouchers will provide crucial resources for career advancement, further contributing to the development of a skilled workforce.

Encouraging Entrepreneurship:

The budget introduces several measures to encourage entrepreneurship and innovation, particularly through the abolition of the angel tax and the consolidation of charity tax exemptions. These steps are expected to simplify financial operations and promote innovation, creating a more conducive environment for start-ups and small businesses. The government's ambitious plans to invest Rs 2 lakh crore in skilling and employment schemes over the next five years further reinforce its commitment to fostering a vibrant entrepreneurial ecosystem.

Conclusion:

The Union Budget 2024 sets a strategic direction for human capital management with a strong focus on skilling, job creation, and women's workforce participation. While successful outcomes depend on implementation, the HR sector is poised to benefit from these forward-looking reforms, shaping a more responsive and dynamic economic environment.

Pioneering Space: How India's New Budget Fuels Space-tech Startups

The 2024-25 budget places a strong emphasis on fostering innovation and entrepreneurship, with the spacetech industry receiving significant attention. With a proposed allocation of Rs 13,042.75 crore, the Department of Space is set to expand India's capabilities in space technology, creating new opportunities for innovation and growth in the spacetech ecosystem.

India's space budget has steadily increased over the years, rising from Rs 10,139.43 crore in FY22 to Rs 12,543.91 crore in FY23, and now Rs 13,042.75 crore. This commitment underscores the government's dedication to enhancing India's space capabilities and supporting spacetech startups.

The Indian National Space Promotion and Authorisation Centre (IN-SPACe) is instrumental in fostering private investment in the sector. Indian spacetech startups have seen remarkable funding growth, from $35 million between 2010 and 2019 to $112 million in 2022, and $62 million by August 2023. These startups are developing cutting-edge technologies such as hyperspectral imaging, 3D-printed rocket engines, satellite propulsion systems, and sustainable green rocket fuels.

Despite promising growth, securing growth capital remains challenging. However, the government is taking several measures to foster innovation. Encouraging collaboration between startups and academic institutions promotes knowledge exchange and leverages research expertise. Additionally, the development of space technology parks and innovation hubs provides essential infrastructure, resources, and support for startups to test and develop their innovations.

Shivani Puri
Editorial Head
MBA HR

The 2024-25 budget is a significant step towards strengthening India's position in the global space tech industry. With increased funding, institutional support, and initiatives to foster innovation, spacetech startups are well-positioned to drive technological advancements and contribute to India's economic growth. The collaborative efforts of the government, research institutions, and startups will be crucial in realizing India's space ambitions.

The Indian Union Budget 2024: Key impacts on the healthcare sector

The Indian Union Budget 2024 has several key impacts on the healthcare sector, reflecting the government's ongoing commitment to improving healthcare infrastructure, access, and quality. Here's an overview of the budget's impact on the healthcare sector:

1. Increased Allocation to Healthcare

- The budget has allocated a significant increase in the overall health budget. This increase is intended to bolster both primary and tertiary healthcare facilities, aiming to improve access to quality healthcare across the country, particularly in rural and underserved areas.
- Specific allocations have been made for health infrastructure development, medical research, and the expansion of medical education facilities.

2. Digital Health Initiatives

- There is a strong push towards digital health, with more funds allocated for the National Digital Health Mission. This initiative aims to create a robust digital health ecosystem, including electronic health records, telemedicine services, and health information systems.
- The budget also promotes the use of AI and other emerging technologies in healthcare to improve diagnostics, treatment, and patient care.

3. Pharmaceutical and Medical Devices Industry

- The budget has proposed measures to boost domestic manufacturing of pharmaceuticals and medical devices, which is crucial for reducing dependency on imports and ensuring the availability of affordable medicines and equipment.
- Incentives and tax benefits have been proposed for research and development in the pharmaceutical sector, encouraging innovation and the development of new drugs.

4. Healthcare Workforce Development

Recognizing the shortage of healthcare professionals, the budget includes provisions for establishing new medical colleges and nursing schools, particularly in underserved regions. This is expected to enhance the availability of trained healthcare professionals across the country.
Skill development programs for healthcare workers, including paramedics and allied health professionals, have also received attention.

5. Ayushman Bharat and Insurance Schemes

The Ayushman Bharat scheme continues to receive strong support, with increased funding aimed at expanding coverage and improving the quality of services under this flagship health insurance program.
The budget also looks at increasing insurance penetration through various initiatives, ensuring that more people are covered under health insurance schemes, thereby reducing out-of-pocket expenditure.

6. Mental Health and Wellness

Mental health has been given more importance in the 2024 budget, with increased funding for mental health programs and initiatives aimed at raising awareness and providing support for mental health issues.
This includes the expansion of the National Mental Health Program and the establishment of more mental health institutions.

Conclusion

The Indian Budget 2024 has placed a strong emphasis on improving healthcare infrastructure, enhancing healthcare access and quality, promoting digital health, and fostering innovation in the pharmaceutical and medical devices sector. The increased budgetary allocation and strategic focus on key areas such as preventive healthcare, digital initiatives, and workforce development are expected to have a positive impact on the healthcare sector, contributing to better health outcomes and greater equity in healthcare access across India.

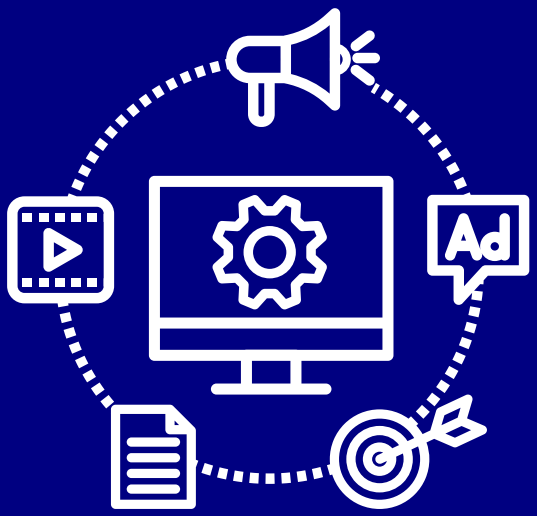
FMCG Sector in India: A Promising Landscape for Startups

India's FMCG sector is a dynamic and rapidly growing market, offering substantial opportunities for innovative startups. The expanding middle class, rising disposable incomes, and increasing urbanization have fuelled a surge in demand for consumer products. This presents a fertile ground for entrepreneurs to introduce new and differentiated offerings.

One promising avenue for startups lies in the rural market. Tier II and III cities represent a vast, untapped consumer base with growing aspirations. Startups can develop affordable and relevant products tailored to the specific needs of rural consumers. For instance, a startup could focus on creating innovative and cost-effective agricultural inputs or consumer durables designed for rural households. Building a robust distribution network in these regions is crucial for success.

The health and wellness segment is another area ripe with potential. As consumers become increasingly conscious of their well-being, there is a growing demand for functional foods, beverages, and personal care products with added health benefits. Startups can explore opportunities in organic, natural, and plant-based products. Additionally, leveraging technology to offer personalized nutrition solutions can create a competitive edge. For example, a startup could develop a mobile app that provides customized dietary recommendations based on individual health goals and preferences.



E-commerce and direct-to-consumer (D2C) models are revolutionizing the FMCG landscape. Startups can leverage digital platforms to build strong brands and reach consumers directly. These businesses can gain a significant market share by focusing on innovative marketing strategies, efficient logistics, and exceptional customer service. For instance, a D2C beauty startup could offer personalized skincare products and leverage social media influencers to drive sales.

Technology-driven innovation is transforming the FMCG industry. Startups can harness the power of artificial intelligence, machine learning, and big data to gain valuable insights into consumer behaviour and preferences. This information can be used to develop targeted products and marketing campaigns. For example, a food delivery startup could utilize AI to optimize delivery routes and predict customer demand.

Finally, identifying and catering to niche market segments can be a successful strategy. By focusing on specific consumer needs and preferences, startups can create unique product offerings and build strong brand loyalty. For instance, a startup could specialize in gluten-free or vegan food products, targeting a growing segment of health-conscious consumers.

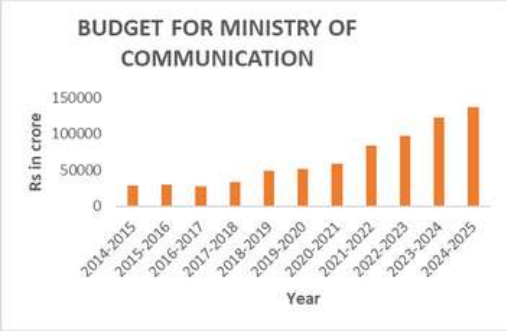
TELECOM : The communication key element

The Union Budget for 2024-2025 announced by FM Nirmala Sitharaman on 23rd July 2024 allocates around ₹1.29-lakh crore for telecom projects and public sector firms under the Telecom Ministry which is 11.03% higher compared to last year. The several key areas of focus for the telecom industry 5G and 6G Development, Rural Connectivity, Domestic Manufacturing, Support for Public Telecom Companies, Regulatory and Security Focus.

The telecommunications sector is pivotal for the rapid growth of digital services in India. India is now among the world's fastest-growing 5G networks, which has significantly boosted its global mobile broadband speed ranking from 118th to 15th as of March 2024. In recent years, the sector has undergone several structural and procedural reforms designed to lessen the regulatory burden on service providers. These changes have fostered a more transparent and industry-friendly environment. In the 2024 Budget, the government’s commitment to expanding broadband access in rural areas is evident through the increased funding for the Bharatnet project and additional capital support for BSNL. This strategy not only aims to boost broadband penetration but also opens up significant opportunities for domestic equipment manufacturers. These manufacturers will be given preference based on their contribution to local value, in line with the Public Procurement (Preference to Make in India) guidelines. Additionally, the increase in customs duties on imported Printed Circuit Board Assemblies (PCBAs) and the removal of Basic Customs Duty (BCD) on rare earth minerals like lithium, copper, and cobalt are clear steps towards encouraging domestic production.

The full Budget 2024, presented by Finance Minister Nirmala Sitharaman, continues to drive towards the goal of a 'Viksit Bharat,' building on the interim budget's vision. These ongoing reforms have led to significant improvements, with overall teledensity rising from 75.2% in March 2014 to 85.7% in March 2024, and internet subscribers growing from 25.1 crore to 95.4 crore during the same period. This growth has been fueled by a substantial reduction in data costs, which has increased average wireless data usage per subscriber.



The government's focus now includes indigenizing telecom equipment as part of its 'Make-in-India' initiative, which is critical from both national security and economic growth perspectives. The Production Linked Incentive (PLI) scheme for telecom equipment has attracted investments of INR 3,402 crore. However, the need for substantial investment in R&D remains, particularly for high-value components like chips, which are still imported. To address this, the government plans to allocate 5% of the annual collections from the Universal Service Obligation Fund (USOF) to telecom R&D.

Increased budget allocations for Bharatnet and BSNL's technological upgrades highlight the government's significant role as a customer for telecom equipment manufacturers. Strengthening the Public Procurement (Preference to Make in India) guidelines, along with the PLI scheme and increased import duties, aims to support domestic manufacturing. However, raising customs duties on Printed Circuit Board Assemblies (PCBAs) may increase costs for telecom service providers deploying 5G networks.

How India's Defense Budget Opens Doors for Startups and SMEs

India's 2024-25 defense budget, with its significant allocation of ₹1,05,518.43 crore for domestic capital procurement, signals a transformative shift in the country's approach to defense manufacturing. This investment, coupled with initiatives like the Acing Development of Innovative Technologies with iDEX (ADITI) scheme, is set to create fertile ground for startups and Small and Medium Enterprises (SMEs) in the defense sector.

Empowering Local Innovation

The ADITI scheme, with its additional ₹400 crore, aims to engage startups, MSMEs, and innovators in developing indigenous defense technologies. This financial support can significantly reduce entry barriers for smaller players. **Creating a Diverse Ecosystem**

By earmarking substantial funds for domestic procurement, the government encourages collaboration between established defense contractors and startups, fostering technological innovation and a robust defense manufacturing ecosystem. **Bridging the Technology Gap**

Startups and SMEs bring fresh perspectives and cutting-edge technologies such as AI, robotics, and cybersecurity. This focus on innovation helps bridge the technology gap in India's defense sector.

Challenges and Opportunities

While startups and SMEs face challenges like long development cycles and stringent quality requirements, the government's commitment to domestic procurement and schemes like ADITI provide crucial support. Increased funding allows these companies to invest in R&D and scale operations to meet sector demands.

Looking Ahead

As India continues to invest in its defense capabilities, the role of startups and SMEs is likely to grow. The 2024-25 budget sets the stage for an inclusive and innovative defense manufacturing sector, inspiring more entrepreneurs to enter the defense space and promoting a cycle of innovation and self-reliance.

Budget 2024: Cultivating a Greener Future for Indian Agriculture

The Budget 2024 marks a transformative phase for India's agriculture sector with a strong emphasis on sustainable growth and technological advancement. A significant highlight is the allocation of ₹75,000 crore for rural infrastructure development, targeting improvements in irrigation facilities and rural connectivity. This investment aims to enhance crop productivity and streamline supply chains, boosting overall agricultural efficiency.

In addition, the budget introduces a ₹10,000 crore fund dedicated to research and development in sustainable agricultural practices. This initiative is designed to promote climate-resilient farming by supporting the adoption of climate-smart technologies and helping farmers adapt to changing weather patterns.

Moreover, a ₹5,000 crore package is proposed to aid smallholder farmers through access to affordable credit and insurance. This financial support will enable farmers to invest in modern equipment and better manage risks associated with crop failures.

Overall, Budget 2024 outlines a comprehensive strategy to advance the agriculture sector. By focusing on infrastructure, sustainability, and financial support, the budget aims to ensure the sector's growth is both sustainable and economically viable, paving the way for a more resilient and productive agricultural landscape.

Lights, Camera, MBA: A Stunning Start for the SHUBHARAMBHA MBA 2024 Batch

The MBA Shubharambha 2024 induction ceremony at MIT WPU launched with an electrifying burst of glamour, graced by our esteemed chief guests, Mr. Saurabh Shah, Director of People Operations at Krafton India, and Mr. Amit Sethiya, Head of Marketing at Syska Group. Their presence on Day 1 infused the event with a sense of prestige and set the tone for an extraordinary seven-day celebration.

The formal proceedings began with a warm and vibrant welcome to all first-year MBA students, who were introduced to the dynamic ecosystem of MIT WPU. The subsequent Days 2 and 3 featured comprehensive and enlightening presentations from the university's top leaders, including the Director, President, Vice President,Chancellor, Vice Chancellor, and Registrar. They offered a detailed overview of MIT WPU's distinctive programs, values, and academic environment, providing students with a clear vision of what lies ahead.

Over the next four days, the event showcased dynamic presentations from various forums and clubs, each highlighting the rich and diverse campus life that MIT WPU offers. The week culminated in a spectacular finale on Days 6 and 7, which included engaging mentoring sessions led by industry experts and a vibrant cultural extravaganza. These final days celebrated the diverse talents and creativity of the student body.

The seamless orchestration of the event, supported by our dedicated dean, associate dean, and enthusiastic student volunteers, ensured a memorable and inspiring start for the MBA Shubharambha MBA 2024 batch. This induction ceremony marked the beginning of an exciting academic journey, filled with promise and opportunity..

CONCLUSION

The Budget 2024, announced on 23rd July, is designed with a strong focus on employment, skilling, MSMEs, and middle-class welfare. The budget's priorities include enhancing productivity in agriculture, promoting employment and skilling, fostering inclusive human resource development, boosting manufacturing and services, urban development, energy security, infrastructure growth, innovation, and next-generation reforms.

- **Standard Deduction and Family Pension Deduction:**

  Increased to Rs. 75,000 and Rs. 25,000 respectively under the new tax regime.

- **Revised Tax Structure:**

  New income tax slabs introduced, benefiting salaried employees with potential tax savings.

- **Capital Gains Tax Simplification :**

  Introduction of two holding periods (12 and 24 months) with revised tax rates, removal of the 36-month holding period, and adjustments in capital gains taxation on different asset classes.

- **Changes in TDS Rates:**

  Reduction in TDS rates for various payments, effective from October 2024 or April 2025.

- **Corporate Tax on Foreign Companies:**

  Reduced from 40% to 35%.

- **Abolishment of Angel Tax:**

  Removal of angel tax provisions under Section 56(2)(viib).

- **Corporate Tax on Foreign Companies:**

  Reduced from 40% to 35%.

- **Abolishment of Angel Tax:**

  Removal of angel tax provisions under Section 56(2)(viib).

- **Capital Gains Tax Simplification :**

  Amendments to various sections of the GST Act to streamline tax collection, appeals, and compliance.

- **Corporate Tax on Foreign Companies:**

  Rs.1.52 lakh crore allocation, introduction of high-yielding crop varieties, and promotion of natural farming.

- **Corporate Tax on Foreign Companies:**

  New schemes for employment-linked incentives, skilling initiatives, and support for higher education loans.

- **Corporate Tax on Foreign Companies:**

  Rs.2.66 lakh crore for rural development, industrial corridor projects, and housing schemes under PM Awas Yojana.

- **Changes in TDS Rates:**

  Enhanced credit support for MSMEs, expansion of SIDBI branches, and establishment of e-commerce export hubs.

- **Corporate Tax on Foreign Companies:**

  Transit-oriented development plans for large cities, focused on improving urban infrastructure.

The budget reflects a comprehensive approach to stimulating growth across various sectors while ensuring social justice and inclusivity. Overall, the budget aims to drive growth, inclusivity, and resilience, addressing current challenges and setting a foundation for long-term prosperity.
